of
Los Angeles*

Share the Ride

Commuting to work on congested freeways can be a time consuming and stressful experience. By exploring a wide range of ridesharing options, employees can save time, save money, reduce stress, reduce traffic congestion, and improve the air quality in Los Angeles County.

Ridesharing enhances the environment!

Carpooling

Two or more people in one car driving to and from work, sharing the ride at least 50 percent of the distance. Carpoolers can include children dropped off on the way to work. Carpooling is a low-cost rideshare option. For assistance in finding a carpool partner or a Rideguide, call 1-800-COMMUTE, visit www.socalcommute.org or contact your departmental Rideshare Manager.

Vanpooling

County employees are encouraged to form "independent" vanpools with co-workers or near-by private/public sector employees. Contact VPSI at 1-800-826-7433, visit www.vanpoolusa.com or call your departmental Rideshare Manager.

Public Transportation in L.A. County

County employees can help make L.A. County a great place to work and live by ridesharing one day a week or more. A full range of commuter options can provide ridesharing solutions that reduce stress, costs, traffic, and air pollution.

Public Transit

Commuting to work by public transit can be stress free, convenient, and economical. For information on routes, ticket prices, schedules, and ADA accommodations, call 1-800-COMMUTE.

MTA Light Rail

For light rail information on service hours, rates, schedules, and routes for the **Red Line** services to-from Hollywood, **Blue Line** services to-from Long Beach, or **Green Line** services to-from Norwalk-Redondo Beach, call 1-800-COMMUTE or visit www.mta.net

Metrolink

For information on commuter rail services to the Antelope Valley, San Bernardino County, Ventura County, Riverside County, Orange County, and the Inland Empire call (800) 371-LINK or visit www.metrolinktrains.com

Workplace Options

Supported by today's communications technology, County employees can effectively replace traveling to work with "telework" from home or an office near home, made possible by "connectivity" options like a home computer, fax, or telephone.

Telecommuting

A management option, telework or telecommuting one day a week, or on a "project by project" basis, can benefit both the employer and the employee. Once approved by management, employees sign a telecommuting agreement, receive training, and can track the travel time savings, cost savings, and the environmental benefits. Contact departmental Telecommuting Coordinators for more information.

Alternate Work Hours

A management option, working a 4/40 hour or 9/80 hour work schedule can reduce traffic and air pollution. Discuss this option with your immediate supervisor or Division Chief.

Guaranteed Ride Home

Ridesharing employees may be provided a "ride home" in emergency situations: a co-worker; taxi; or car rental. Contact departmental Rideshare Manager for details.

Ridesharing just one day a week can enhance our air quality
